

PelhamPlastics

QUALITY POLICY

Pelham Plastics is a custom manufacturer of high quality injection molded components and also provides a wide variety of value added assembly services specializing in the medical device industry.

Pelham Plastics offers design assistance and prototyping as well the production of custom medical device components and assemblies. We utilize the latest technology in injection molding and assembly. Pelham Plastics provides a single-source facility for both R&D and consistent production to fulfill the needs of our medical, consumer and electronics customers.

Pelham Plastics recognizes our customers demanding market place and are committed to providing them with quality product and on time delivery.

Pelham Plastics is further committed to comply with the requirements, to maintain the effectiveness and continually improve our Quality Management System.

Our VISION is to be the most efficient and effective contract manufacturer specializing in the medical device industry.

Our MISSION is to bring our customers ideas to reality.
